

## Step up to the T8

Experience durability, accuracy, dependability and portability all in the same remarkable affordable machine.

# T8 Journeyman Tile Saw

◆ Features ◆ Advantages ◆ Benefits ◆

## Simply better by design.

The journeyman tile saw has the most advanced drive system available—the pulley and cog belt is a high torque drive system. The bearings are double sealed for use in wet and dirty environments. The drive system is smooth running and delivers 20% more horsepower to the blade than conventional V-belt drives.

The design of the slide tray and frame provide rigid alignment between the blade and slide tray. The saw is consistently accurate. There are no adjustments required.

Little or no maintenance is required because of the efficient design. There are no slides to grease or wheels to wobble.

### Power Requirements

- ◆ 115 Volts
- ◆ 7.4 AMP Circuit

### Warranty

Full, one-year warranty.

Model No. CPJTS8  
Item No. 100000

- ◆ **Stainless steel**—construction gives durability and ease of cleaning.
- ◆ **Lightweight**—only 48 pounds, can be carried in one hand.
- ◆ **Drive system**—cog belt, pulleys, and sealed bearings deliver high torque and long life.
- ◆ **Size**—13" x 32" footprint fits in tight job site location and the back seat of a car for transport.
- ◆ **Accurate cuts**—14" x 14" tile.
- ◆ **Maintenance**—minimal because of slide tray with glides instead of traditional slides or wheels.
- ◆ **Available accessories**
  - Adjustable stop
  - Stand
  - Workstation
